Purpose ?

Some say..

 "A picture is worth a thousand words"

Others say..

 "A song is worth a thousand words"

We say..

"A song and a picture are worth a million words"

___

Generate playlist based on the context of the image.

Content means moods or the object.

Both work.

How does it work ?

Recognition

Playlist generation

"Happy"   or   **"Man"**

Happy song

Song about a man
